## Top Product Benefits

### Design Flexibility

Select from more than 900 architectural finishes, more than 100 glass finishes, or layer, die-cut or customize a variety of films to meet your design needs — the possibilities are endless.

### Cost-effective

3M surface finishes are a cost-effective alternative to traditional construction materials, allowing you to leave your design signature on a project.

### Remodel and Reuse

By refreshing rather than replacing existing surfaces, you can help reduce landfill waste and obtain LEED credits — for beautiful designs you can feel good about.

### Easy to Clean & Maintain

Your're designing for durability with surfaces that repair easily and stand up to commonly used cleaners without degradation.

### Quick Installation

Reimagine almost any surface with 3M™ Films installed quickly and easily by certified 3M installers and create less downtime, noise and disruption for your clients.

### Meet Specifications

We demonstrate our commitment by achieving third-party certifications when a standard exists and is applicable to one of our products.

# 3M DI-NOC™ Architectural Finishes

These 190, on trend, patterns were selected to have increased inventory in your local market to respond faster to your project needs.\*

**Order completed**  
*Shipped from Distributors*

**Targeted Site Arrival**  
*≤ 5 business days*

Contact your local 3M distributor or 3M sales representative to learn more about this program and availability of specific patterns for your project.

Not seeing patterns that work for your project?  
There are an additional 700+ patterns.\*\*  
Scan the QR code to learn more!

\* For projects requiring 5-10 rolls, longer lead times may apply.  
\* For projects requiring ≥10 rolls, longer lead time will apply.  
\*\* Patterns outside the 190 patterns in this brochure will have longer lead times.

## PREMIUM WOOD - PW SERIES

The new Premium Wood Series expresses the realistic appearance and texture of natural wood. The controlled reflection of the matte coating technology is combined with both fine and deep wood grain embossing and high-quality printing. This unique technology creates the optimum tone and texture of each species of wood.
